## **Dual Lane Tray Shrink Wrap System from Douglas** *Increases packaging production of canned fruit*

ALEXANDRIA, MN., April 10, 2013 – With the Douglas Contour™ dual lane tray shrink system, smaller pack counts can be run without decreasing line speeds. Products can be tray packed and film wrapped in single lane 12-packs at 80 trays per minute and changed to dual lane 6-packs at 160 per minute maintaining high filler speeds. The machine uses a single corrugated blank for standard blank handling and efficiencies in the magazine. The perforated blank is separated and glued within the machine for the dual lane packages. Another option available is 3-sided, shelf ready display trays in single and dual lane operation at comparable speeds.

Already proven at hundreds of installations in the food and beverage industry, the Contour shrink pack systems are the best machine for achieving efficient operations for shrink wrapping with trays, pads, u-boards or film only, while maintaining the highest package integrity. These versatile systems handle multiple product sizes and package configurations on demand, at high speeds.

Learn more about how the [Contour™ Shrink Wrap Systems](#) can solve your packaging challenge. For more information, call 320.763.6587 or visit [www.douglas-machine.com](http://www.douglas-machine.com).

### **About Douglas Machine Inc.**

Founded in 1964, Douglas Machine Inc. is recognized as a global leader in automated secondary packaging solutions for paperboard, corrugated, and shrink film. The company specializes in the design and manufacture of cartoners, sleeves, case and tray packers, and shrink wrap systems. Based in Alexandria, Minnesota, Douglas is an employee-owned company that has installed more than 7,000 machines in 30 countries. For more information, visit [www.douglas-machine.com](http://www.douglas-machine.com).
